

## BRAND &amp; DESIGN SYSTEM

# The FinFlo design language.

The logo, colour, type, and UI system that make FinFlo feel like one product — a precise, confident, trustworthy interface for handling other people's money.

PRECISION ENGINEERING FOR MODERN FINANCE

## IDENTITY

## Logo & wordmark

The mark is a single pulse-wave stroke that flows through a blue → violet → pink gradient and terminates in a pink node — money in motion, settling. It pairs with the **FinanceFlo** wordmark and the *Banking OS* tag.

**FinanceFlo**  
BANKING OS

### The pulse-wave mark

One continuous stroke reads as a financial waveform — flow, rhythm, recovery — anchored by the pink settlement node at its end.

### The brand gradient

Blue ( `#3b82f6` ) → violet ( `#8b5cf6` ) → pink ( `#ec4899` ), applied to the mark and to **gradient text** accents.

## FOUNDATIONS

## Colour

Indigo is the primary brand colour; the blue→violet→pink gradient is the expressive accent. A near-black slate panel grounds the brand chrome, and emerald / amber / rose carry semantic meaning.

### Primary indigo

`hsl(243.4 75.4% 58.6%)`

### Brand gradient

`#3b82f6 → #8b5cf6 → #ec4899`

### Dark panel

`#020617` · slate-950

### Emerald · success

`#10b981`

### Amber · warning

`#f59e0b`

### Rose · danger

`#f43f5e`

**Light background**

hsl(210 40% 98.5%)

**Border**

hsl(214.3 31.8% 91.4%)

FOUNDATIONS

# Typography

**Plus Jakarta Sans** is the single typeface across the product, in weights 300–800. One intentional cap keeps the UI from shouting: globally `font-black` maps to 700 and `font-extrabold` maps to 600 — headings stay confident, never heavy.

## Precision engineering for finance

DISPLAY · 30PT · WEIGHT 700 · TRACKING -0.03EM

Body copy is set at a comfortable reading size with a 1.55–1.6 line height. It carries the detail of a screen — balances, schedules, and ledgers — without fatigue, in a regular 400 weight.

BODY · 11PT · WEIGHT 400

CAPTION · UPPERCASE · WEIGHT 600 · TRACKED

### 300 · Light

Quiet supporting text.

### 500 · Medium

Leads and emphasis.

### 700 · Bold

Headings and labels.

COMPONENTS

# UI system

The interface is built from **shadcn/ui-style primitives** on Radix + Tailwind, with a consistent `0.75rem` corner radius. Loading uses skeletons, not spinners; sensitive values are masked by default.

### Radius 0.75rem

One corner radius across cards, inputs, dialogs, and pills for a cohesive surface.

### Skeletons over spinners

Lists and cards load with layout-shaped skeletons, so the page never jumps.

### Masked sensitive data

`SensitiveData` hides balances and identifiers until intentionally revealed.

### Composed primitives

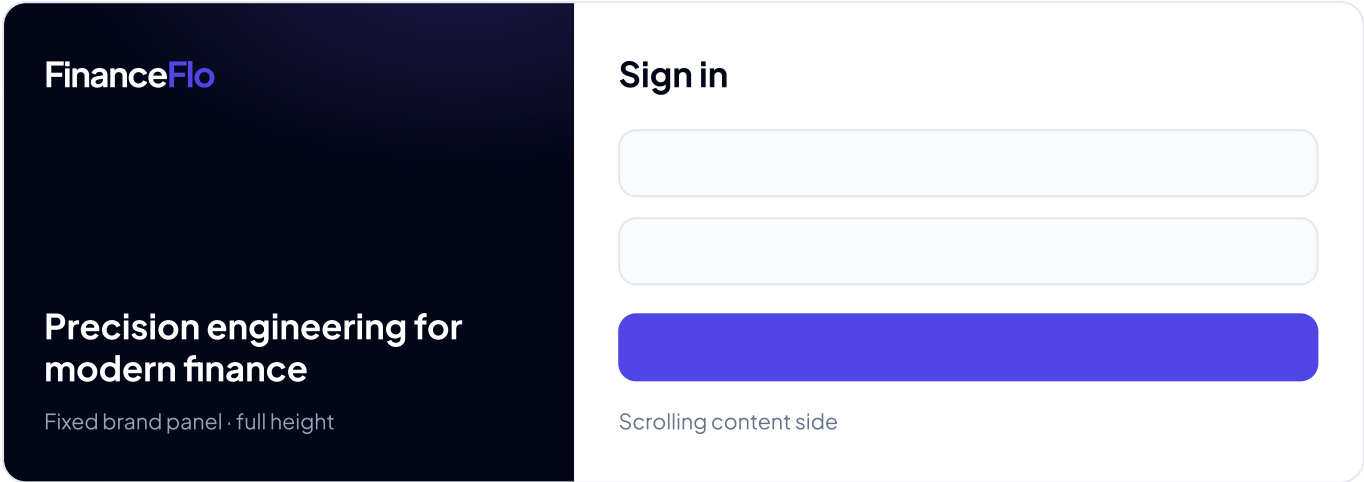

Reusable building blocks keep every screen consistent (below).

| PRIMITIVE          | PURPOSE                                                   |
|--------------------|-----------------------------------------------------------|
| FormField          | Label + control + error / hint, composed as one unit.     |
| SectionHeader      | Consistent section titles within pages and modals.        |
| StatusBadge        | Semantic status → tone, via a shared tone map.            |
| ModalShell         | Fixed header / scrolling body / fixed footer for dialogs. |
| DataTable          | Config-driven list with loading skeleton and empty state. |
| AccountNumberField | Read-only account number with a Generate action.          |

PATTERNS

# Layout patterns

The signature chrome is a **split screen**: a dark slate brand panel on the left and content on the right. It frames authentication and the onboarding wizard. On desktop the brand panel is fixed full-height while the content side scrolls.

EXPRESSION

# Voice & tone

FinFlo handles other people's money, so the voice is **precise, confident, and trustworthy** — never breezy, never alarming. Copy explains, states limits plainly, and earns trust through clarity.

**Precise**

Exact language for amounts, dates, and states — no ambiguity.

**Confident**

Direct, calm, and clear — the tone of a system you can rely on.

**Trustworthy**

Honest about limits and risk; transparent about money movement.

**Signature line**

"Precision engineering for modern finance."
